Integers: Any positive or negative whole number, including zero.

- From now on we are going to be working with _____ numbers
- We will sometimes get _____ answers!!!

Adding and subtracting with positive numbers:

- Use a _____ to help you solve these problems.
- You always start on the first number.
- If you have addition, move _____ on the number line
- If you have subtraction, move_____ on the number line

Ex: 3 – 7 = First, start on the number 3. Since it is subtraction, move left seven times. You will end on (-4), so (-4) is your answer.

a. b. c. d.

If the 2nd number is a negative:

- You need to _____ **and** change the math operation sign.
- Always leave the first number alone!!!!

Ex: 4 + (-2) = I can see the 2nd number is negative so I will change it and the sign

4 – 2 = Now that I changed it, go and find the answer like we did before

a. b. c. d.
